

SECOND GRADE NEWSLETTER

OCTOBER 2026

REMINDERS

Dismissal: Dismissal is every day at 2:10 pm. Please ensure that whoever is picking up is on your child's Blue Card.

Blue Cards: Please make sure that you have returned the blue card for your child to your classroom teacher. Please be sure there are 3 other emergency contacts listed on the blue card.

Media Release Forms: Please make sure to return the media release form indicating whether you wish to have your child photographed throughout the school year at school events.

REMIND/Google Classroom: Please make sure to join your classes remind in order to receive important information throughout the school year.

Folders: Please make sure you are checking your child's home folder every night. Important notices will be sent home in this folder. This folder must come back to school every day.

ASSESSMENTS

MH Module 2 Weekly Assessment
Math Topic 2 Assessment
Foundations Assessment: Unit 2

AT A GLANCE

Module 2 - Look Around and Explore
Essential Question: How does exploring help us understand the world around us?

WHAT WE ARE LEARNING

Reading, Writing, Math, Science

READING:

In Reading this month, students will listen to and read texts that inspire them to look at the details in the world around them to learn new things. Stepping outside to observe the plants and animals in nature can provide opportunities for exploration. Exploration can also take place inside a good book!

WRITING:

In Writing this month, students will be able to write a descriptive essay about a place they have visited or want to visit. Students will learn about many ways to explore the world. They will also be able to organize their writing in 3 parts; introduction, body, and conclusion.

MATH:

In Math this month, students will focus on determining whether a number is even or odd, and on finding the total number of objects in situations involving equal groups of objects.

SCIENCE:

In Science this month, students explore different habitats and the plants and animals that live in them. Students will investigate how plants depend on their habitats to survive and how habitats can change over time. They will use what they learn to explain how changes in a habitat can affect the plants and animals living there.
